

HIS & HERS 2013

What will it be tonight? A four-course al fresco dinner with a side of jazz? Or popcorn and a flick on the patio? A toss of a coin reveals it's movie night, but with over 300 films to choose from, you opt for a double feature of an apocalyptic drama followed by a tried-and-true tearjerker. Settling in, you click a button—your television emerges from its discreet, underground cache, telescoping upward and unfolding to reveal its mega 201" C SEED screen. The accompanying 7.1 digital surround sound heightens the anticipation, as it should—the speakers were developed by CAT—California Audio Technology, Inc., using the most advanced marine-grade components specifically developed for super yachts. You can't find this level of superiority anywhere on land. As you marvel at this epic theater experience, you wonder how the two of you ever managed to enjoy at-home movies before now.

A true audio- and video-ophile's dream, the system includes technologically advanced speakers, subwoofers, and amplifiers that project unparalleled sound, a DirecTV® satellite and DVD management system, and a built-in movie package featuring up to 300 movies and concerts (The American Film Institute's 100 Most Thrilling American Films and 100 Greatest Love Stories, the remaining 100 are your choice). Oh, and that never-ending argument over who controls the remote? Not an issue—two Apple® mini iPads™ serve as the remotes, one for him and one for her. The entire system is delivered at your doorstep and includes installation and programming.

With every Ultimate Outdoor Entertainment System purchase, Neiman Marcus will donate \$10,000 to The Heart of Neiman Marcus Foundation. For details, visit NeimanMarcus.com/FantasyEntertainmentSystem or call 1-877-9NM-GIFT.
